Sample structure for teachers

From one card to a Super challenge.

Start with any Dupoto challenge card. These five steps stretch it into a bigger, braver project that takes courage, planning and a smart risk.

Choose a card, then choose how to work it: on your own, in a pair or as a group.

1. 

Chase a mammoth

Turn the card's prompt into one big goal your students can say in a single sentence.

Ask
What would success look like when we finish?

2. 

Build your village

Decide who is on the team, who outside the class could help, and who it is for.

Ask
Who else cares about this?

3. 

Cross the river

Choose one smart risk that takes courage but is safe to try.

Ask
What is the bravest step we can take safely?

4. 

Gather at the campfire

Pause to reflect together on what worked, what was hard and what you would change.

Ask
What surprised us along the way?

5. 

Earn your feathers

Show what you did and what changed, then celebrate it. Keep one piece of evidence for each student's portfolio.

Ask
Who needs to see this, and why?

Every Super challenge sits within your school's own safeguarding and risk-assessment policies.
